Hi Varda,

I am writing you to ask once again that you please take care of the leaking roof and the holes and water damage on the ceiling and on the walls in our kitchen and bathroom in our apartment at 10-63 Jackson ave 8C that were the result of leaks from the roof on 11/19/2015.

You sent a text message yesterday (11/30/2015) stating the contracting company is going to test the roof without any further details. I am not sure what this means or when it's taking place. Does this mean the roof is still leaking? It's now 12 days since the leak happened on 11/19/2015 and I am still not sure whether the roof is patched and our apartment has gaping holes in the ceiling with water damage on the ceiling and walls. It's raining today and will rain heavily tomorrow. I cannot be at home during the day to catch the leaks if they happen so I really hope the roof was patched at least temporarily.

You haven't acknowledged our emails and complaints including the most recent ones on 11/24/2015 and 11/30/2015. Please let us know what's happening with the roof being fixed and when we can expect the holes in our apartment to be patched and painted.

Hi Varda,

Today 11/30/2015 it is 11days since the second leak has happened on 11/19/2015. Hardly anything has been done about it. You mentioned that the roof has been patched but I will have to wait until strong rainfall to confirm that. Our prior concerns about the fact that our apartment's habitability is seriously impacted have not been acknowledged or addressed. We are forced to live on guard about the roof leaking, to be vigilant about plaster falling from the holes in the ceiling and with limited use of our kitchen as plaster dust continues to fall on everything below the hole.

We have not heard from you in a week. This situation is detrimental to our health, please address it immediately.

Hi

Chris got injured while working on the roof in the weekend.
He was in the hospital on Monday November 23, 2015
and got an injection and thought that he will be able to come today November 24, 2015
to perform the job.
I will call him again tomorrow and also I will contact Rita to see what can be done.

I will keep you posted

Varda
